DETAILED ACTION

Election/Restrictions

1. Claims 2-3 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/18/2007. Claim 4 as amended is considered a subset of generic claim 1 and is acted on below.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. The phrasing of the claim limitations in conditional format "if...if...if...if...if" is indefinite and contrary to statute. Further, the ambiguous phrasing of the "point is positioned at..." is considered ambiguous and indefinite as it does not specify the location on the respective member.

4. Further, as to claim 4, to recite the conditional in claim 1 followed by "each projecting member" in claim 4 is illogical.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 5, 6 are rejected under 35 U.S.C. 102(b) as being anticipated by any one of references A-C on the attached PTO-892.

7. Each of the above references has a lower traveling structure, a revolving superstructure frame, a work implement on the latter, a counterweight on the superstructure, and an operator's cab on the superstructure. Each has a work implement with a projecting vertex and a projecting tool at distal end. Applicant's ambiguous claims read on no projecting member on the superstructure and counterweight, present in all three references. All have a projecting vertex on the implement as well as a projecting tool end on the implement. Each reference defines a virtual plane as easily as that of applicant, that angled plane extending through an arbitrary point at the left side of the counterweight and cab (P7 & P3) and through either the vertex or end of the implement. Such a plane does not encompass the entire cab and hence the claim is met.

8. As to claims 5-6, all three references have a boomerang shaped implement.

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over any one of references A-C on the attached PTO-892.

11. Welding, casting and forging are well known processes not given patentable weight in a product claim (MPEP 2113). Further, the vertex and tool of the work implement both have bases attached to the superstructure.

Allowable Subject Matter

12. Claim 7 is allowed.

Response to Arguments

13. Applicant's arguments with respect to claims 1, 4-6 above have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

14. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
